

# **Live Green**

Recognition Program  
After Action Report

Project Name: Letterboxing

Number of Youth participated: 40

Length of Project: 14 months and on-going

How did your group/organization choose your service project? Did you identify two or three of the most important environmental needs facing your installation or community? This was a suggested project by my supervisor. This project continues to enlighten and educate participants with nature while getting significant exercise. Our community is surrounded by conservation land and historical state parks. It's great to be able to have the children experience these areas.

Describe challenges, if any, faced during your service project. Transportation getting off base.

What resources, skills, or assets did you use to get your service project completed? With the assistance of others at the Youth Center, transportation was given to the participants. We used letterboxing.org to research different areas to explore.

Describe your group's long term goal or purpose in conducting your project? This project is refreshing in that, as a group, we get the opportunity to leave off base to enjoy the "wild". We would like to continue Letterboxing and providing children the opportunity to learn more about their natural surroundings.

What does success look like for your project? Can it be measured? Is it attainable? We measure it by the children's reactions and that they keep asking to go again!

**Please use additional sheet for comments or suggestions. As a nature lover I enjoy that I can make the Letterboxing trip more enjoyable for the children by sharing interesting facts about trees, leaves, and the natural habitat.**
